New York, NY

EDUCATION

Bachelor of Science - Computer Science

Aug. 2021 - May 2025

Stony Brook University

Stony Brook, NY

Relevant Coursework: Software Engineering, Technical Communications, Computer Networks, Computer Security Fundamentals, Principles of Database Systems

EXPERIENCE

AI Fellow | *Handshake AI* (Remote)

Dec 2025 - Present

- Evaluated domain-specific prompts to assess performance of large language models (LLMs) in audio, visual, text, and task comparisons, improving accuracy by 50%+
- Analyzed LLM outputs for scientific accuracy, clarity, and depth in specialized subfields
- Improved AI performance and understanding of complex tasks through expert review and feedback

Project Management Intern | *LADYSURVIVORS & Family Benches* (New York, NY)

July 2025 - Aug. 2025

- Researched and compiled profiles of 50+ organizations and local council members for outreach
- Coordinated external communications by drafting outreach emails to civic groups and other nonprofits achieving a 95% positive response rate
- Designed and produced 30+ content pieces, including handbooks, flyers, and business cards, to support awareness initiatives

Teaching Assistant | *Stony Brook University* (Stony Brook, NY)

Aug. 2023 - May 2024

- Assisted in delivering course content on object-oriented programming (OOP) concepts to 120 students
- Directed and graded bi-weekly 90-minute labs providing debugging support to 30 students
- Held bi-weekly office hours to provide individualized guidance and support to students

PROJECTS

Job Application Tracker CLI | *TypeScript*

Feb 2026 - Present

- Built a command-line (CLI) application to efficiently track, manage, and retrieve job application data
- Designed and implemented a Node.js backend integrating with the Google Sheets API for persistent data storage, enabling structured data management without a traditional database
- Implemented RESTful APIs to support CRUD operations for application entries, ensuring scalable and modular data handling

FakeStackOverflow | *React.js, Node.js, Express.js, MongoDB*

Dec. 2023

- Developed a mock full-stack Q&A platform with secure authentication, search, and post management features
- Implemented RESTful APIs for user sessions and content routing; integrated bcrypt-based password hashing to secure API endpoints
- Designed responsive front-end components and optimized database indexing to reduce search query response times by 20%

Online Stock Trading System | *Java, MySQL*

May 2025

- Engineered a full-stack stock trading simulator that supports user authentication, live balance updates, and transaction tracking
- Incorporated secure data persistence for stock trading simulator by integrating Java backend with MySQL via JDBC, achieving a 100% transaction success rate and consistent transaction states

Multi-Threaded Chat Server | *C*

May 2024

- Modelled a concurrent chat server using POSIX threads and mutexes to handle synchronized message exchange between multiple clients
- Diagnosed and resolved race conditions and deadlocks, enhancing connection stability and throughput under stress testing
- Optimized thread-safety and synchronization primitives, achieving 10% higher concurrency efficiency compared to baseline

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, C, Ruby, JavaScript, TypeScript, HTML, CSS, SQL, Bash
- **Frameworks & Libraries:** React, Node.js, Express.js, Spring, NumPy, Matplotlib, pandas, seaborn, scikit-learn
- **Databases:** MySQL, MongoDB
- **Developer Tools:** Git, GitHub/GitLab, VS Code, Visual Studio, IntelliJ, Eclipse, Unix/Linux, Vite, Docker
- **Concepts:** Agile, DevOps, REST APIs, Object-Oriented Programming, Data Structures & Algorithms, Multithreading
- **Natural Languages:** English, Cantonese, Mandarin
