EXPERIENCE

AI Fellow | *Handshake AI* (Remote) Dec 2025 - Present

- Evaluated domain-specific prompts to assess performance of large language models (LLMs) in audio, visual, text, and task comparisons, improving accuracy by 50%+
- Analyzed LLM outputs for scientific accuracy, clarity, and depth in specialized subfields
- Improved AI performance and understanding of complex tasks through expert review and feedback

Project Management Intern | *LADYSURVIVORS & Family Benches* (New York, NY) July 2025 - Aug. 2025

- Researched and compiled profiles of 50+ organizations and local council members for outreach
- Drafted outreach emails to civic groups and other nonprofits, achieving a 95% positive response rate
- Designed and produced 30+ content pieces, including handbooks, flyers, and business cards, to support awareness initiatives

Teaching Assistant | *Stony Brook University* (Stony Brook, NY) Aug. 2023 - May 2024

- Delivered course content on object-oriented programming (OOP) concepts to a class of 120 students
- Facilitated and graded bi-weekly 90-minute labs providing debugging support to 30 students
- Held bi-weekly office hours to provide individualized academic guidance and technical support

PROJECTS

Chatbot That Remembers You | *TypeScript, Next.js, PostgresSQL, pgvector, Vercel AI SDK* | [GitHub] Oct 2026

- Built an AI chatbot with persistent long-term memory, extracting user-specific facts from conversations and storing them in PostgresSQL for retrieval across sessions
- Implemented semantic memory retrieval using vector embeddings and pgvector cosine similarity search to provide relevant user context to the LLM when generating responses
- Integrated LLM-powered fact extraction and streaming response generation, enabling the chatbot to update stored memories as conversations evolve

URL Shortener | *TypeScript, React, Express, Node.js, GitHub Actions, Docker, PostgreSQL* | [GitHub] Sept 2026

- Engineered a full-stack URL shortener implementing URL creation, redirection, deletion, input validation, and click tracking
- Containerized the PostgreSQL database with Docker compose and implemented database migrations for reproducible local development and testing
- Automated a GitHub Actions CI pipeline that provisions PostgreSQL, applies migrations, and automatically executes 15+ unit and integration tests on pushes and pull requests

TECHNICAL SKILLS

- **Programming Languages:** Java, Python 3, C, Ruby, JavaScript, TypeScript, HTML5, CSS, SQL, Bash
- **Frameworks & Libraries:** React, Next.js, Node.js, Express.js, Spring, JDBC, Vue
- **Databases:** MySQL, MongoDB, PostgreSQL
- **Developer Tools:** Git, Docker, Unix/Linux, GitHub/GitLab, GitHub Actions, Vite, Vercel AI SDK
- **Concepts:** Agile, DevOps, REST APIs, Object-Oriented Programming, Data Structures & Algorithms
- **Natural Languages:** English, Cantonese, Mandarin
- **Certifications:** IBM DevOps and Software Engineering (Coursera, Jan 2026)

EDUCATION

Bachelor of Science - Computer Science Aug. 2021 - May 2025
Stony Brook University *Stony Brook, NY*
Relevant Coursework: Software Engineering, Technical Communications, Data Structures, Algorithms, Computer Networks, Computer Security Fundamentals, Principles of Database Systems
